## **ELECTRICITY FOR** USE IN FARMING.

### VARIOUS MEANS OF APPLYING!

Large and Small Scale-Display in New York in November,

tern A turn of a switch is all that is necessary. With thouse of electricity, the modern farmer may have at his command all of those appliances, which are commonly used in the city name. It is the electric flat from we bling machine needs are the electric flat from we bling machine needs are the electric flat from we bling machine needs are the electric flat from we bling machine notor huffing and grinding sets cooking and baking out fits broiler, chaining dish etc. These appliances appeal especially to the housewife.

Pumps are at very important item of farm equipment and motors may be readily adapted to the operation of all types The motor liven pump is a perior, both as to economy and officiency when compared with pumps operated by windrails of other sources, we skitted Benedum & Trees, the Print or power interest and depreciation sylvania oil men who are said to be

onsidered

The automatic feature of the electric pump for drairage or tank supply service will be invalidable to the farm of the locations at a distance from the house

Electric refriger from likewise has a strong appeal for the farmer who has enough perisal ble product to be able to use it to go of advantage and he is fully aware of the financial feature who has also of being able to keep his produce in cold storate to obtain higher pieces. On farms where much milk is produced and in every day power.

Thing the soil is now accomplished maked it will enable the Kühn interwith decrete power the plot being ests to control it. Chart situation for the many backgand to chartest the field in an endess were cable actuated by a care and harrows are smallily on a cate when the sensor is copy are grown, the electric driven the control for the sensor is copy are grown. The electric driven control for the sensor is copy are grown, the electric driven the sensor of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount off Park Land Company to different from the steam of produce of the Mount of Park Land Company to different from the steam of produce of the Mount of Park Land Company to different from the steam of the Mount of Park Land Company to different from the steam of the Mount of Park Land Company to different from the steam of the Mount of the M

milking machine cream separator and butter worker. These are reading adopted to electric crive. Where the adopted to electric tarties where is potential of the electric service is Railroad Company Pull R. Brief reasonably constair (the electric cubator has no equil and in barns and some service and some service in the some service is reasonably constair, who had been reigh clerk in the some service in the some service is reasonably constaint.

subject is scarcely in a satisfactory state at the present time, but some experimenters have found good results with electric charges led directly into the soil while others have obtained good results by pringing in the next, and the soil while others have not work of electrified conductors at a height of three or four feet above the growing crop. Include is a held for Saves Cost for Power and the electric vehicle on the full The advantages of the electric true over the horse drawn wagor no doubt will be equally as great for short hands as in the city expectation of our rotal because. our runal highways

Liec neity for the farmer is no long or a fancy it is a fact. There is still from for the perfection of many com it to the General Run of Work During sible for the furmer of moderate the Seasons in Farming Both on a means to real himself of this wonder ful energy but the central power strains the live theming to the importance of this class of business and f Except in a few isolated insight (ACIIS we will see right advantes a tions of comparatively recent over this direction.

The first overlap demonstration in

this direct on The first could demonstration in motion, electricity has not as yet been identified with agriculture. In fact, it is importance in this neid has been to suggested. The hist of electricity in the mining industry is a fairly well developed branch of this broad subject, and it is been used more and more for operation of numps for triggation. For the ordurary operations, of farms however person is during a farms however person is during a farms however person is during the most part from steam or gas olene engines and it is not intrequent that we see the ord time treat milt still in use. olene engines and it sold thresport
